

# ANGIO CENTER

**First Israeli Private Interventional Multi Disciplinary  
Team**

Specialist in Minimally Invasive Medicine

# Overview

Angio Center is the leading privately held Israeli medical group specializing in innovative minimally invasive therapies.

Our physicians are top ranked professionals from a wide spectrum of medical specialities.

Since establishment in 2007, we have helped many thousands of patients to ease and overcome their illness.

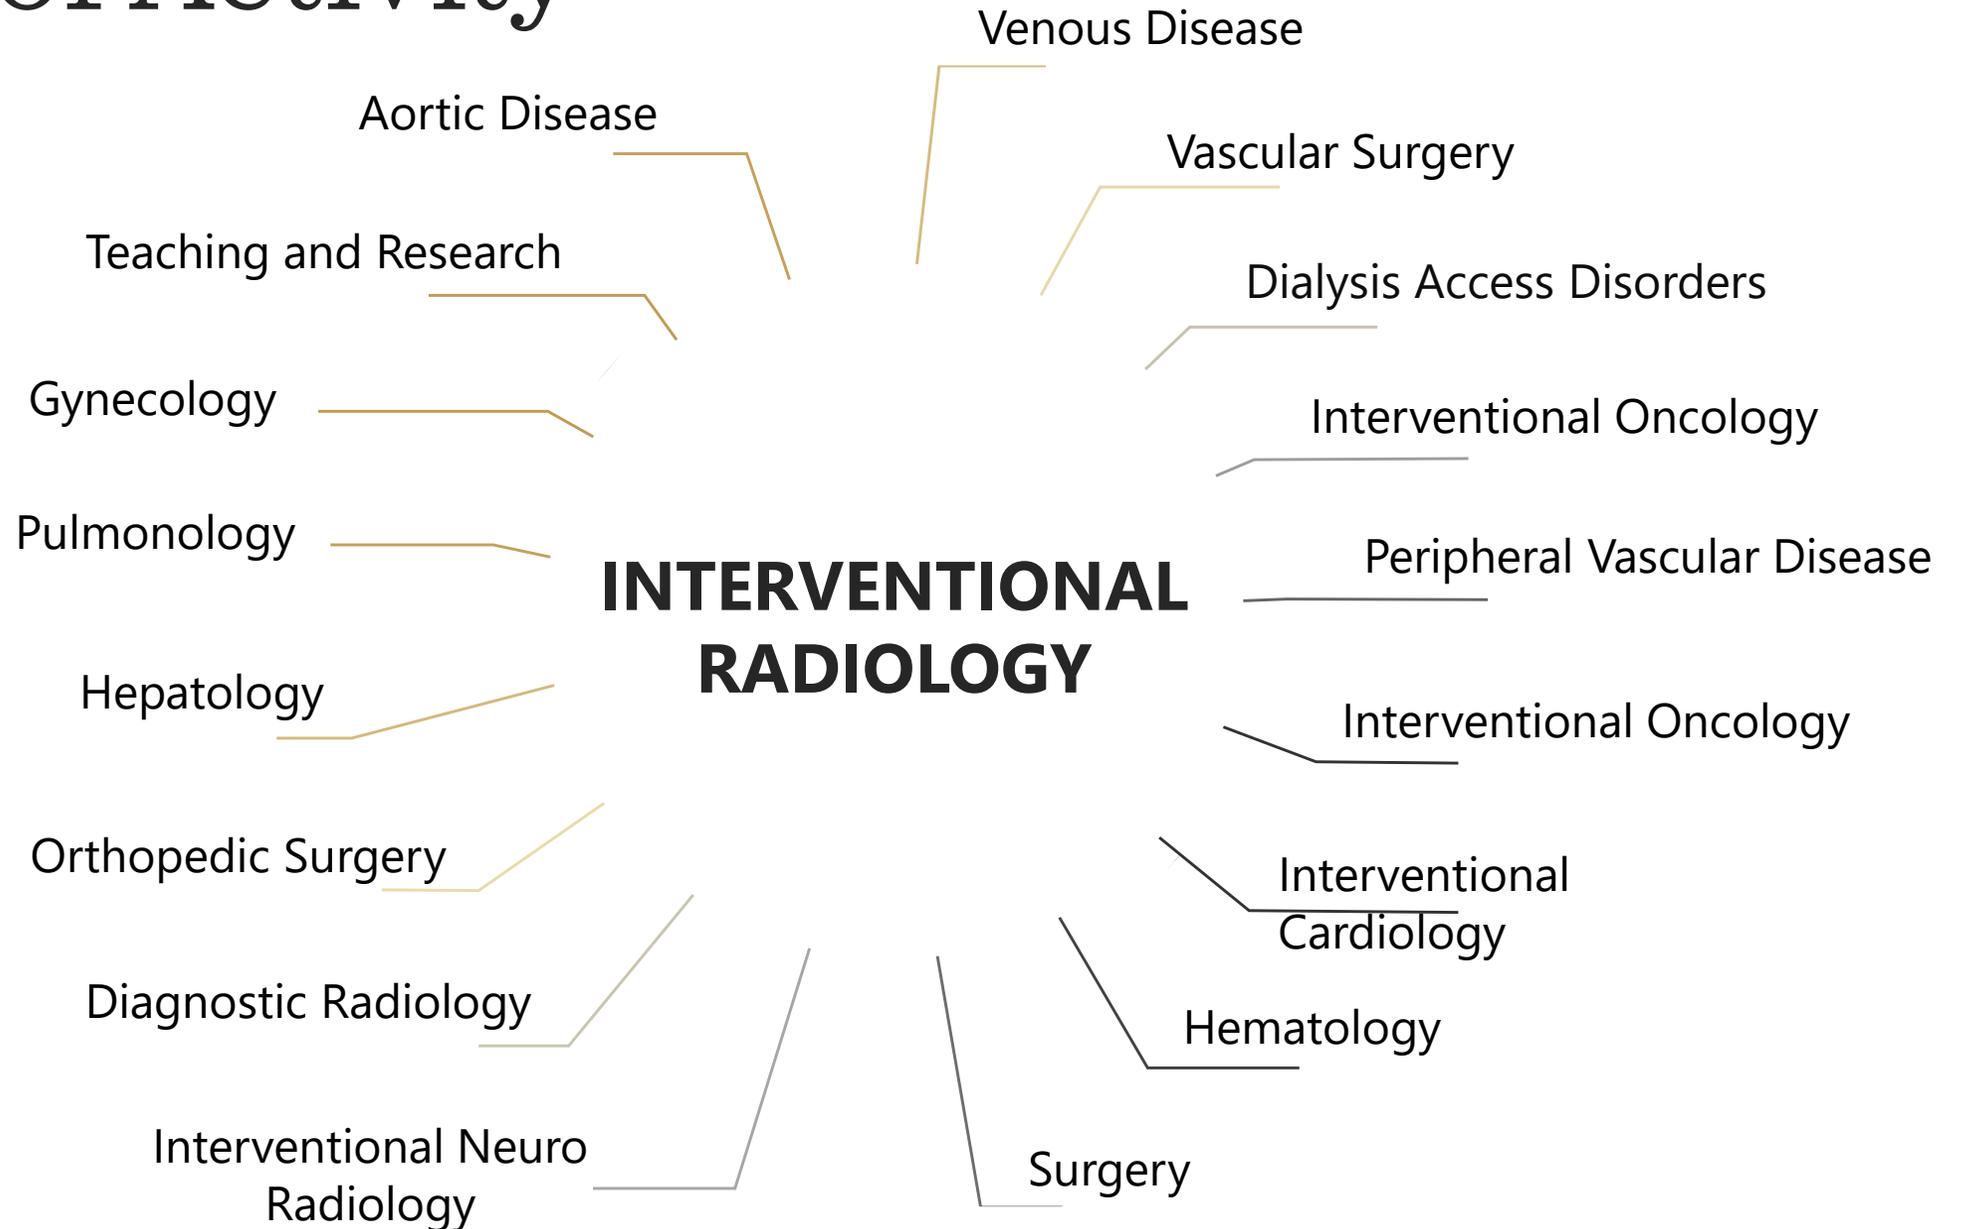

Working with all public and private insurance companies in Israel, Angio Center is obliged to provide state of the art treatment to every patient.

Angio Center has become over the years a reliable address for medical tourism to Israel, especially for patients from former Soviet Union republics. Our doctors have helped to establish modern health services around the globe and are constantly engaged in educational activities for young generations of physicians around the world.

Medical innovation is our passion. Thinking out of the box is our philosophy. We genuinely believe that modern medicine must combine these two approaches in order to bring solutions that will both address illness and improve the life quality of the patient.

We know it is possible. We do it every day.

# Scope of Activity

# The Team

Dr. Alexander Belenky, MD, PhD,  
**Founder and President**

With over 60 scientific publications, numerous patents and tutor of many generations of world class physicians around the globe, Dr. Belenky is one of the pillars of interventional radiology. Dr. Belenky is the head of the largest interventional radiology unit in Israel in Rabin university medical centre composed of 3 hospitals. As the founder of Angio Centre, Dr. Belenky aims to bring innovative state of the art minimally invasive medicine to serve the needs of every patient.

Dr. Maxim Saksonov, MD, MBA,  
**VP of Business Development and Innovation**

Dr. Saksonov is a board certified interventional radiologist and the chief of interventional radiology service in Assuta Ashdod public hospital in south of Israel. Dr. Saksonov operates in the exciting boundary of high-tech innovations and medicine with a goal to find and implement ground breaking solution to provide the best treatment possible. He is the first in Israel to implement life changing minimally invasive interventions for the treatment of such conditions as bleeding haemorrhoids and knee osteoarthritis which replace surgery and improve patient life quality.

# The Team

Ms. Edna Spector

## **Head of Administration**

Ms. Spector is one of the leading health care administrators in Israel. With a resume of serving in leading positions in Clalit - the largest Israeli health care insurer and provider, and as a founder of numerous multidisciplinary physician teams, Ms. Spector brings vast experience in health care management and insurance strategy.

Dr. Dov Dicker, MD

## **Chief of OBGYN service**

Dr. Dicker is a world class gynaecologist with over 30 years of experience. As former head of OBGYN ER department in Rabin medical centre and former head of OBGYN department in Tel Aviv university, Dr. Dicker is a master of women health and reproductive medicine. Dr. Dicker is an enthusiast of medical innovation in a mission to bring effective and life quality concerned solution to every women condition.

# The Team

Dr. Yifat Lechinsky, MD  
**Chief of Surgery**

Dr. Lechinsky is the chief of surgery in Angio Centre and the head of colorectal surgery and proctology unit in Assuta Ashdod public hospital. She has completed her post doctoral fellowship in St. Marks Hospital in London UK where she had mastered complex surgical techniques for treatment of colorectal cancer including the innovative taTME technique of combined minimally invasive abdominal ant trans-anal surgery.

Dr. Zeev Kobzancev, MD  
**Chief of Vascular Surgery**

Dr. Kobzancev is the chief of vascular surgery in Angio Centre and the head of Vascular Surgery unit in Assuta Ashdod public hospital. With over 25 years of experience, Dr. Kobzancev is a master of complex aortic and carotid surgeries along with other procedures.

Dr. Ahihud (Udi) Bendet, MD  
**Interventional Oncology**

Dr. Bendet is the chief of Interventional Oncology in Angio Centre and the head of Interventional oncology service in Rabin medical centre in Israel. He is a pioneer in minimally invasive treatments for cancer such as radio and chemo embolizations, cryo, microwave and radio ablations of tumours and other techniques some of which replace surgery and bring life quality solutions to oncologic patients.

# The Team

Dr. Guy Refaeli, MD  
**Interventional Neurology**

Dr. Refaeli is a world class interventional neurologist and chief of interventional neurology unit in Rabin Medical Centre. He has completed his post doctoral fellowship in Bechate Claude Bernard Hospital in Paris and since then serves as one of the leading physicians in Israel for endovascular treatment of acute strokes, brain aneurysms, and vascular malformations of the central nervous system.

Dr. Yaron Brin, MD  
**Orthopaedic Surgery and  
joint replacement specialist**

Dr. Brin is the chief of orthopaedic joint replacement unit in Meir medical centre in Kfar Saba Israel. He has completed his post doctoral fellowship in Mccgill University Medical Centre in Montreal, Canada – one of the leading arthroplasty centres in north America. Dr. Brin is a pioneer in novel knee and hip arthroplasty techniques.

Dr. Eran Tamir, MD  
**Orthopaedic Surgery  
Foot & Ankle Specialist**

Dr. Tamir is the head of Foot and Ankle Unit in Assaf Harofe medical centre and the head of orthopaedics in Angio Centre. He has completed his post doctoral fellowship under the guidance of the father of foot and ankle surgery Dr. Tim Daniels in St. Michaels Hospital, Toronto. Dr. Tamir is a father of revolutionary minimally invasive surgical techniques that help in saving legs from amputation in diabetic patients.

# The Team

## Prof. Oren Fruchter, MD, PhD, **Chief of Pulmonology**

Prof. Fruchter is the chief of Pulmonology in Angio Centre and the head of Pulmonology and respiratory intensive care department in Wolfson medical centre in Tel-Aviv. He was chosen by Forbes as one of the best physicians in Israel in 2016-2020. Prof. Fruchter is the master of chronic and acute respiratory diseases such as COPD, asthma, pulmonary fibrosis, pulmonary hypertension, and others.

## Dr. Pablo Codner, MD **Interventional Cardiology**

Dr. Codner is the chief of Cardiology in Angio Centre, and a senior interventional cardiologist and structural heart disease specialist in Rabin medical centre. He has completed his training in NY Presbyterian hospital and Columbia university hospital medical centre. Dr. Codner is world class master of complicated cardiac interventions including TAVI.

## Prof. Ilan Ron, MD **Medical Oncology**

Prof. Ron is one of the leading oncologists in Israel. He has trained and worked in Memorial Sloan Cathering Hospital, NY and in Leeds Cookridge hospital UK. After his return to Israel Prof. Ron leads oncologic clinical research in Israel and serves as the head of research laboratory that develops novel cancer treatments from natural resources. He is the author of more than 80 scientific publications and pioneer of novel cancer treatments.

**Angio Centre team includes leading physicians in Israel in multiple other medical specialities such as:** Urology, Haematology, Diagnostic Radiology, Male fertility and sexual dysfunction, Plastic reconstructive surgery, and others.

What We Treat?

# PROCEDURES

## Interventional Radiology

### **Peripheral Vascular disease**

Diabetic foot  
SFA and iliac lesions  
Aortic lesions  
Hand arterial lesions

### **Aortic Interventions**

EVAR, TEVAR,  
Trauma

### **AV Malformations**

Acquired  
Congenital  
Venous  
Lymphatic  
Mixed

### **Haemorrhoids**

Endovascular  
embolization

# PROCEDURES

## Interventional Radiology

### **Biopsies and drainages**

Biopsies drainages –  
CT,US,MRI.  
Biliary interventions –  
Stone removal, PTBD  
Haemorrhoid embolization

### **Abdominal arterial interventions**

Splanchnic arteries  
aneurysms,  
Renal artery stenoses,  
Embolizations

### **Venous interventions**

Venous insufficiency,  
Venous congestion  
syndromes,  
Dialysis access –  
creation/treatment

# PROCEDURES

Interventional Urology  
and Gynecology

Interventional  
Neuroradiology

## **Male health**

Prostatic artery  
embolization  
Varicocele embolization

## **Female health**

Uterine fibroid  
embolization,  
Pelvic congestion  
syndrome –  
varicoovaries

## **Emergent**

Endovascular  
management of stroke,  
intracranial bleeding

## **Elective**

AVM's, AVF's,  
Carotid artery stenting,  
Intracranial and CNS  
aneurysms

# PROCEDURES

Interventional Oncology

Hepatology

## **Embolization – primary and secondary tumors**

Chemoembolization  
Radioembolization  
AML embolization  
Portal and hepatic vein  
embolization

## **Ablation – primary and secondary tumors**

Microwave  
Radio  
Cryo

## **End Stage Liver Disease**

TIPS  
Variceal embolization

## **Diagnostic**

Percutaneous biopsy,  
Trans Jugular Liver  
Biopsy

# PROCEDURES

## Vascular Surgery

### **Carotid Surgery**

Endarterectomy  
Bypass

### **Dyalisis**

Access creation

### **PVD and AORTA**

Open aortic surgery,  
Bypasses

## Orthopedic Surgery

### **Osteoarthritis**

Geniculate artery  
embolization

### **Foot and Ankle Surgery**

All types

### **Joint Replacement**

Knee, Hip,  
Arthroplasites

### **Other**

Bone biopsies  
Osteoid osteoma ablation

# Other Conditions

## **OBGYN**

Female fertility  
Pregnancy Management  
Endoscopic surgery

## **Pulmonology**

Chronic pulmonary disease  
– COPD  
Asthma  
Pulmonary hypertension  
Fibrosis  
Bronchoscopies

## **Haematology**

Coagulation disorders  
ITP  
Thrombocytosis  
Thrombocytopenia  
Anemia

# Business Proposal

# **Angio Center in UAE**

PATIENT ORIENTED MEDICINE

## The Goal:

Promote state of the art innovative medicine in the Middle East.

## Target population:

1. UAE residents.
2. Medical Tourism.

## Assumptions:

1. There is much to gain in the sphere of healthcare from the recent historic Abrahamic agreements.
2. Israeli medicine and financial/ infrastructure capabilities of UAE can mature to worldwide state of the art medical environment.
3. Angio Centre already has well established medical tourism infrastructure, especially from former Soviet Union countries.
4. Our top physician team is multidisciplinary, mobile, and is capable answering multiple medical needs.

# How?

- Cooperation with UAE centres and specialists.
- Use of UAE medical facilities, when possible, by our visiting team.
- Multi Directional Medical Tourism – UAE to Israel, Israel to UAE, Rest of the world to UAE.
- Daily online consultation service for our clients.
- Establishment of Angio Centre branch in UAE. Visited regularly by our physicians. Consultation clinic.
- Establishment of an Education Centre for physicians from the middle east led by our staff.

# What we seek?

Strategic Partnership to promote our vision:

**1**

Joint investment in establishment of Angio Centre branch in UAE.

**È**

Assist with regulatory and bureaucracy issues in UAE.

**É**

Assist with approach and negotiation with medical centres in UAE.

**F**

Joint investment and management of marketing activity in UAE and around the globe.

**5**

Joint management and investment in education centre for physicians.

The background of the slide is a light beige color with a network of thin, dark brown lines connecting various circular nodes. The nodes are of different sizes and colors, including dark brown, gold, and light beige. The overall pattern is a complex, interconnected web of lines and dots, suggesting a network or data structure.

# THANK YOU!
